

Vegetables (Traditionally Grown)

Welcome to
Globification Experts

India is the largest producer of ginger and okra amongst vegetables and ranks second in production of potatoes, onions, cauliflowers, brinjal, Cabbages, etc. Amongst fruits, the country ranks first in production of Bananas (26.08%), Papayas (44.05%) and Mangoes (including mangosteens and guavas) (45.89%).

The vast production base offers India tremendous opportunities for export. During 2020-21, India exported fruits and vegetables worth Rs. 9,940.95 crores/ 1,342.14 USD Millions which comprised of fruits worth Rs. 4,971.22 crores/ 674.53 USD Millions and vegetables worth Rs. 4,969.73 crores/ 667.61 USD Millions.

Elephant Yam/Suran

the elephant foot yam or whitespot giant arum, is a tropical tuber crop grown primarily in Africa, South Asia, Southeast Asia and the tropical Pacific islands. Because of its production potential and popularity as a vegetable in various cuisines, it can be raised as a cash crop.

Suran, or Elephant yam, is the edible bulb or corm of a very unique looking single-stalked, flowering plant. After a year underground, the corm develops a unique flower with a central flowering stalk encircled by one large, maroon petal and topped with a similarly colored bulbous knob. The stalk can reach up to one meter in height.
